

## JLG Forklift Parts

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora set out on a cross country excursion in their RV. Freshly retired, after spending several years working with his brother to develop their crane company into an industry leader, John had no idea that momentous trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling equipment was the end consequence of a road trip.

During their trip, John reacquainted himself with former business acquaintances along the way. In combination with these conversations and a noteworthy event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered an infinite market for a product that could promptly and securely elevate individuals in the air to accomplish maintenance and other construction functions.

Following their return from holiday, John set up a business with two of his friends and purchased a metal fabrication company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they produced and sold their first JLG aerial work platform in 1970. The business incorporates some of the basic design elements of that original lift into existing designs.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove came back from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the company has expanded itself into many different international marketplaces and continues to develop modern machines to ensure that customers are able to become safer and more resourceful within their workplace.
